PERSONAL PROJECTS

E-Learning Website (01/2019 – 05/2019)

- E - Learning web app prototype.
- Features(Student) : Login, Register, Videos, Notes, Ask doubt, Quiz
- Features(Admin) : Add Videos, Add Notes, Add Notes, Reply to doubts, Students details.

Eye Care 2020 Web App (06/2019 – 06/2019)

- A web app that constantly monitors our screen time and reminds after every 20 minutes to follow the 20 20 20 rule. After every 1 hr of screen time it reminds us to move around and stretch our body for at least 5 mins .

XMI to Pseudo Code Converter GUI tool (02/2019 – 04/2019)

- A GUI tool which parses a .xmi file which is generated from the sequence diagram using the Visual Paradigm software and then it converts the .xmi file into pseudo code, identifies all the properties of sequence diagram and generates control flow graph for the same.

File renaming GUI tool version2.0 (08/2018 – 09/2018)

- An updated version of the renaming tool version1.0.
- Implemented using python, with GUI.
- Before renaming any file the older file name is preserved as backup and copied into the first line of the file and then the renaming process start.
- Supports .c , .cpp , .py extensions.

File renaming tool version1.0 (01/2017 – 03/2017)

- File naming tool implemented in C. A CLI tool which scans a preferred folder and renames all the files present in that folder. The renaming process uses file naming convention to rename all the files. For eg: hello_world.c --> HelloWorld.c
